

1. Construct the graduation of line a.

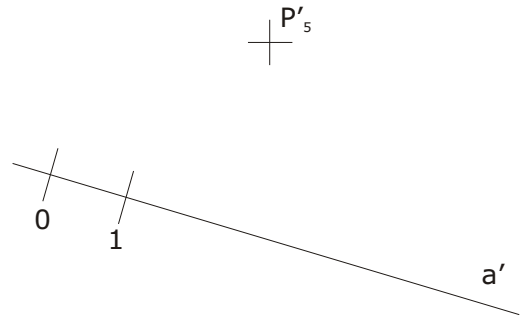

2. Construct the level lines of plane (P,a).

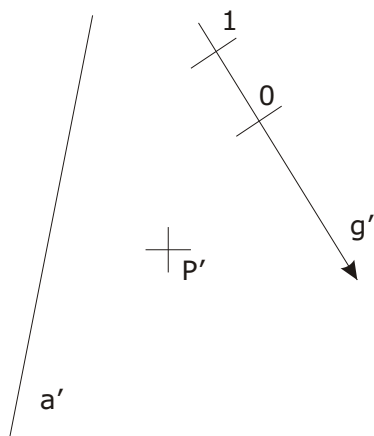

3. Construct the level lines of the given plane (axb).

4. Construct parallel line to the given line a through the point P_5.

5. Take the point P and line a to the plane g.

6. Construct the line of intersection of the two given planes g_1, g_2.
